-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

Art Unit: 2614

1. Applicant's affidavit filed under rule 131 is acceptable. However, a new reference is now applied. The examiner regrets prolonging prosecution.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are now rejected under 35 U.S.C. 102(e) as being anticipated by Oh.

The receiver of Oh (noting particularly Figs. 3 and 6) is capable of receiving high-definition television and contains a pilot signal (col. 4 lines 14-15). Standard components include receiving tuner 12 with an oscillator 80; SAW filter 14 and downstream IF band amplifier 16; down convertor 50 with oscillator 52; LPF 54 which passed the down converted signal containing the pilot wherein LPF 70 is used for detecting the pilot; and carrier restorer 60 which demodulates the filtered signal and extracts the pilot therefrom. A memory is included in microprocessor 100 for storing frequency offsets (deviation, error) values (col. 6 lines 14-32) that are computed by element 90. Microcomputer controls the frequency of the tuned channel by sending feedback data to element 18 according to the data in the memory, thereby meeting claims 2 and 3.

As for claims 1 and 4, a lock detector 78 operates when the pilot coincides with the fixed frequency of oscillator 68, meaning that no separate pilot is extracted and the oscillation

frequency is tracked (col. 5 lines 12-20). Deviation data is then updated (step 180 following lock detection step 130 in the flow chart of Fig. 6).

As for claim 5, when the pilot is extracted, element 90 detects frequency offsets for controlling the oscillation of the tuned channel.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. The examiner regrets not bringing this reference to applicant's attention earlier in prosecution.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday - Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
